

SPRAY GUN 95T

ADHESIVE SPRAY GUN

This is a Binks gun outfitted with the exclusive USL Tornado Nozzle. It is used for the application of single component water based adhesives.

The Tornado Nozzle not only creates a vacuum for better fluid delivery, but also reduces overspray by dispersion through a circular spray pattern. In addition, the 95T has a built-in air adjusting valve for convenient air atomization control and a non-adjustable fluid control knob to prevent unnecessary adhesive build up in the fluid nozzle.
